2:45- 3:00 p.m.	<i>Break/Exhibits</i>		
3:00- 4:00 p.m.	1 credit – Joint Injections, Palpation and Ultrasound	Richard Radnovich, DO	
4:00- 5:00 p.m.	1 credit – Joint Injections, Palpation and Ultrasound	Richard Radnovich, DO	

Saturday, August 13			
6:45- 7:25 a.m.	Registration Sign-in, Breakfast/Exhibits		
7:25- 7:30 a.m.	Welcome	David R. Crimin, DO	
7:30- 8:30 a.m.	1 credit – Regenerative Medicine	Craig Chappell, DO	
8:30- 9:30 a.m.	1 credit – Student Research <i>Poster Presentations, Sponsored by</i>	Noorda and RVU – See enclosed Abstracts	
9:30- 9:45 a.m.	<i>Break</i>		
9:45- 10:45 a.m.	1 credit – Neurology - Movement Disorders	Trenton Overall, DO	
10:45- 11:45 p.m.	1 credit – Reporting Concussions and Other New Discoveries	Alina Fong, PhD	
Adjourn	<i>Total Credits for the 3-day activity = 20 credits*</i>		

*The Utah Osteopathic Medical Association is accredited by the American Osteopathic Association to provide osteopathic continuing medical education for physicians. The Utah Osteopathic Medical Association designates this program for a maximum of 20 of AOA Category 1-A credits and will report CME and specialty credits commensurate with the extent of the physician's participation in this activity.

* This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Utah Medical Association through the joint sponsorship of the UMA Foundation and the Utah Osteopathic Medical Association. The UMA Foundation is accredited by the Utah Medical Association to provide continuing medical education for physicians. The UMA Foundation designates this live activity for a maximum of 20 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

2022 Annual CME Conference Schedule

Surviving and Thriving in the Age of Dr. Google

Thursday, August 11, 2022

OMM 1 – Pelvic / Sacral mechanics– 2 hours
Chris Edwards, DO

OMM 2 – Manipulation of the Pre- and Post-natal patient – 2 hours
Chris Edwards, DO

Telehealth – 1 hour

What's new, determining if a telehealth appointment is appropriate for the patient's care, billing 101 for remote medicine, documenting to get paid.

Jaleen Johnson, Northwest Regional Telehealth Resource Center

Medical Cannabis Therapy – 1 hour

What is the law and allowed conditions, understanding compassionate use board, what conditions respond to and which have a higher rate of failure, monitoring cannabis patients for adverse reactions, finding the therapies that work. What are the protocols that are working?

Marc Babitz, MD

The Business of Creating Health – 1 hour

Today there are medical business models from solo to corporate physician. The models include Direct Primary Care, Concierge medicine, mixed insurance/cash clinics, captive business owned clinics, and large hospital owned practices. Let's discuss the advantages and disadvantages of each and how to incorporate the beneficial components into your own practice

John Sanders, DO

Keeping Your Sanity – 1 hour

Finding the balance between Professional, Public and Private life. Understanding how and when to set the boundaries for your own sanity and recognizing when you need extra help taking care of yourself.

Alice Akunyili, MD

Friday, August 12, 2022

MTHFR and Pituitary Dysfunction – What is it and why should we care? – 1 hour

MTHFR and other methylation snps usually cause a certain pattern of vitamin deficiencies, especially when looked at on an intracellular level. These deficiencies, sometimes very significant, can lead to lower production of pituitary and thus adrenal, testicular, or thyroid hormones. Keep in mind that a fundamental and obvious rule of endocrinology is "good nutrition in leads to good hormones out." These centrally located endocrine organs (such as the pituitary) can then appear to be damaged or dysfunctional, usually by some unknown cause, almost always mistakenly construed as pituitary dysfunction or damage.

Dan Purser, MD

Utah Controlled Substance Database – 1 hour

How to use the database to your advantage and to protect your patients and yourself. Do you know the most recent legal changes and requirements that may affect how you manage your patients.

Mary Frankos, Department of Professional Licensing

Promoting Healthy Lifelong Vision – 1 hour

Eyecare supplements and promoting visual longevity.

Doctor Education – Internet Research for Doctors – Verifying Dr. Google. – 1 hour

How to find and verify all the stuff your patients tell you about. Staying up to date and getting back to research. Learning to be open to treatment modalities or possibilities that you have never heard of or are unfamiliar with. Patients are being introduced to herbology, homeopathy, energy medicine, crystal healing, EMF fears, chelation therapy, antigen therapy, and naltrexone therapy to name a few – all via the internet. Not being familiar with these treatment modalities can lead to frustration for the doctor and patient.

2022 Annual CME Conference Schedule

Surviving and Thriving in the Age of Dr. Google

Darell D

Schmick, MLS, MBA, AHIP

The Cares Act and Open notes law – 1 hour

Do you know what the Cares Act is and the Open Notes law? Do you know how it affects your practice and how to avoid being out of compliance?

Brandon Hobbs, JD

Geonomics – 1 hour

Learn more about the research findings and current clinical use of geonomics.

Howard McLeod, PhD

Joint Injections, Palpation and Ultrasound – 2 hours

How to properly do a joint injection with palpation and/or Ultrasound. What solutions work best for what situation?

Learn how to do it right the first time and be a Rock Star in your patient's opinion. Have an opportunity to practice your skills.

Richard Radnovich, DO

Saturday, August 13, 2022

Non-surgical Orthopedics – Regenerative Medicine – 1 hour

What is Regenerative Medicine and what is the benefit to me and my patients? Exploring the science behind regenerative medicine, what's new, what works and what does not work and how to advise patients.

Craig Chappell, DO

Student Research Poster Presentations

Neurology – Movement Disorders – 1 hour

Perplexing neurologic disorders that our patients bring to us – Essential Tremors, Myoclonus, Parkinson's, etc. How to best evaluate and treat these patients and what is on the horizon.

TBD

Reporting Concussions and Other New Discoveries

Alina Fong, PhD
